

Agenda

10:00 - 12:20 CDT

Welcome to ICCON - Target's Infra Cloud Conference

 **Hari Govind**
SVP of Infrastructure, Target

Keynote: All Things SRE at Target

 **Vasilios Hoffman**
VP of Production Engineering, Target

 **Scott Raynovich**
Futurion Founder and Principal Analyst

The guest experience is at the foundation of all Target technology. Join us for a conversation on Target's transformation to an open infrastructure and enterprise cloud operating model. Hear how this enables us to seamlessly operate business critical services powered by highly resilient infrastructure.

SRE as a Force Multiplier

 **Kamini Dandapani**
VP of Infrastructure Engineering, Airbnb

 **Jay Singonahalli**
Sr. Director Technology, Target

Dive into the role of SRE operations, and hear success stories of building and leading highly effective SRE teams across organizations of different sizes and domains. Two SRE leaders share their reliability journeys at companies like eBay, LinkedIn, Airbnb and Target.

Interactive Whiteboard Session: Designing a Multi-cloud Operating Model

 **Armon Dadgar**
CTO and Co-Founder, HashiCorp

Hear an industry leader's insight on designing a multi-cloud operating model, end-to-end software development life cycle.

Deeper Dive with Armon Dadgar and an Overview of Systems at Target

 **Armon Dadgar**
CTO and Co-Founder, HashiCorp

 **John Engelman**
Sr. Director Technology, Target

Join Target leadership in a conversation with Armon Dadgar, HashiCorp Co-founder & CTO, as they explore Multi-cloud capabilities; John will then present an overview of Systems at Target

Challenge Conventional Thinking on Build Tools

 **Helen Altshuler**
CEO and Co-Founder, EngFlow

Keep engineers in flow - explore a new perspective on developer productivity, where engineers can worry less about build systems and slow builds, turning their focus towards building great software.

Embrace Network Duality

 **Ryan Wiley**
Cloud Network Solutions Architect, Audi

 **Ratna Malladi**
Principal Product Manager, Target

Dive into a topic on everyone's mind: how to develop an operating model that truly maintains consistency between cloud workloads and the majority of data and apps still residing on-prem. Join two networking veterans as they discuss how to ensure business agility in the face of this duality and the demands it puts on infrastructure teams.

Live Q & A

 **Pablo Espinosa**
VP of Network Engineering, Target

Lunch break with DJ Will

12:45 - 3:00 CDT

Improving the Guest Experience Using Multimodal Learning for Fashion

 **Min Wang**
Lead Data Engineer, Target

Min will showcase Target's latest research on machine learning designed to improve the guest experience through understanding domain-specific tasks with the alignment of vision and natural language - a technical deep-dive into a visual question answering system for fashion.

Delivering Trusted Data at the Speed of Business

 **Michael Willette**
Technical Fellow, USAA

Learn how USAA integrates data infrastructure and data management capabilities to deliver trusted, integrated, and timely insights to drive world-class member experiences and outcomes in a compliant and cost effective manner.

Data and the Guest Experience

 **Anupama Joshi**
Sr. Director Technology, Target

 **Sam Charrington**
Founder, TWIML and Host, the TWIML AI Podcast

Join us for a lively discussion on the world of data infrastructure and where it is heading. Hear how Machine Learning at Target helps consistently deliver a better guest experience. Topics in this conversation include: what's next in modern data pipelines and straight talk about on-prem vs. public cloud.

Being Real About Your Culture

 **Carin Taylor**
Chief Diversity Officer, Workday

Hear Carin open up about what it means to "walk the walk" for organizational diversity commitments. How can you embrace what is unique about your company and team culture? She will share straight talk on resources and programs that work. What new community initiatives should enterprise technology teams know about?

Live Q & A and Closing Remarks

 **Brenda O'Kane**
VP of Infrastructure, Target
